**LED**  **Light for you**  
powered by OSRAM  
**CERTIFIED PARTNER**

**“DigiLED” is proud to announce the partnership with OSRAM “LED LIGHT FOR YOU” Network.**

### **What is “LED LIGHT FOR YOU?”**

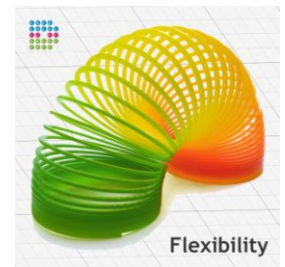

The networking concept: *Not only solutions.....implementations too!*

**LED LIGHT FOR YOU** is a worldwide Network program powered by OSRAM to bring customers and LED lighting solution partners together. To ensure the highest level of quality and service all the time, OSRAM appointed DigiLED as one of the **“CERTIFIED PARTNERS”** in INDIA. This is a worldwide network of service and solution providers for LED lighting market. We have achieved this certification after strict certification process by OSRAM. Our main goal in this active network is to support growing needs of the customers for quick production with superior Electronic Manufacturing services.

Is it for me? *Yes, if you relates to any LED lighting!*

Yes, absolutely! If you are a lighting professional, lighting designer, architect or Light Manufacturer, it can benefit you. Simply discuss your requirement with our team and they will guide you through the process. No matter your lighting application is exceptional, or as a standard application, our technical team is prepared to answer you. Depending on your requirement, you can choose between full manufacturing service, or only system integration, Electronic designing of your product, only EMS or complete turnkey design to production solutions.

Working methodology: *It really works!*

If you are in the field of LED lighting business, this is the right place! As “LED light for you partner”, we can support you with the implementation of your LED lighting projects with OSRAM Opto semiconductors. The main role of an LLYF partner is to understand study and implement customer’s requirements and guide them with the correct path, and process to build a successful product within the target price customers may expect. It’s our guarantee that we and OSRAM together will help you to integrate and produce a high quality OSRAM LED applied product through our quality EMS and assembling services.
